# RDRS Experiences

RrSG perspective

Sarah Wyld
5 March 2024
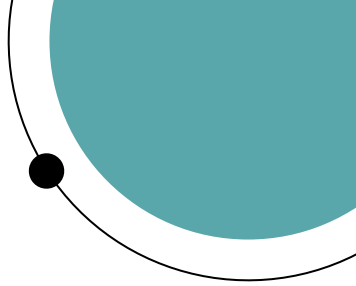

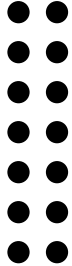

ICANN | RrSG
Registrar Stakeholder Group

RrSG Experiences

- Overall experience has been positive
- With some improvements it could be even better
    - Functionality & user interface
    - Requestor-provided info
- The RDRS is additional work; it ***is*** worth the effort
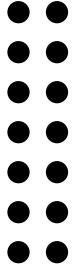

Functionality

- 'Pending requestor input' status

- Modified set of required info for a request
- Export the request information

- View all requests at once
- View request date on an individual request
- View which IANA ID a request is for
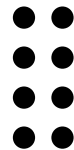

Requestor-provided info

- Understanding requestor identity
- Incorrect request category, especially LEA
- Requests marked as Expedited without basis

Background & extra info

RDRS overview

- RDRS pilot will run for 2 years maximum
  - Gathering registration data disclosure request volumes
  - Help inform the Board's decision about building an SSAD
- Standing Committee's task is to review the monthly data, consider improvements & lessons learned
- Areas for improvement:
  - *Registrars are asking for*: 'pending input' status; easy export; view all requests with date & IANA ID, ability to adjust request category; complete request info.
  - *Requestors are asking for*: Ability to request ccTLDs; ability to request Privacy/Proxy data reveal; ability to get data confidentially (without notifying the domain owner)
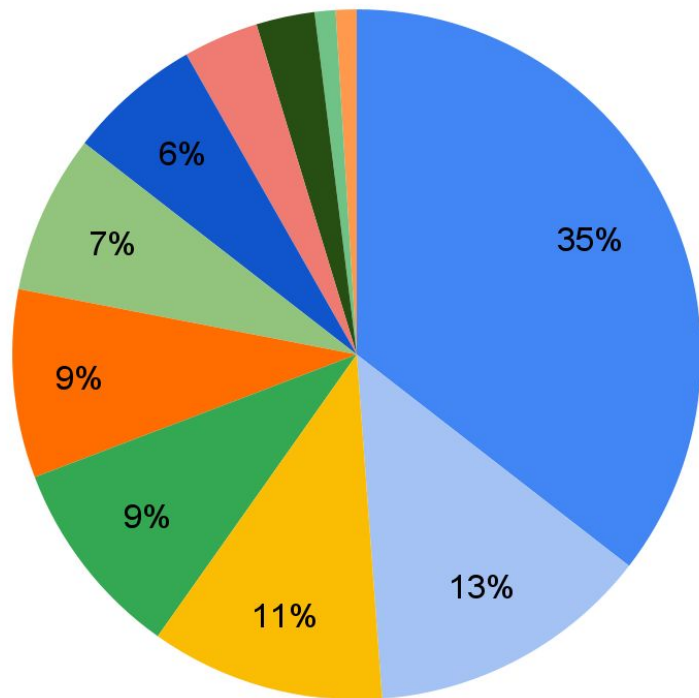

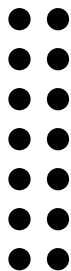

Metrics

ICANN Reports:

- [February 2024 (Reporting period: 01 January – 31 January 2024)](#)
- [January 2024 (Reporting period: 28 November – 31 December 2023)](#)
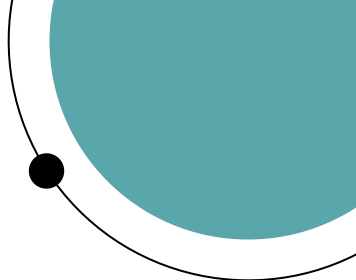

Highlights (*from the February report*):

- **75** registrars participating
- **851** requestors signed up during January 2024, bringing the total up to **2332**
